- **Yvonne Goolagong-Cawley** – Tennis, MBE, OA

BeePower® Nature's Superfood – all Australian

BeePower® Nature's Superfood is a specialised Bee product made from native Australian produce. Manufactured in beautiful Mudgee NSW, it is one of the few naturally occurring high calibre food sources that contain exceptionally concentrated supplies of quality nutrients.

BeePower® is arguably the best pollen product in the world. It has higher levels of effective ingredients than any other documented product.

Nutritional Information

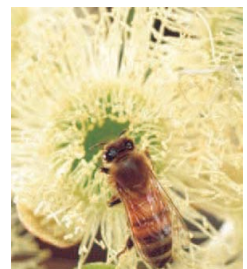

BeePower® contains a multitude of Vitamins, Minerals, Amino Acids, Proteins and other important nutrients, is rich in **Anti-oxidants and has a Low GI. Plus BeePower® contains Omega 3, Vitamins A, B & C, Zinc and Calcium. Bee Power® is Gluten Free and 98% Fat Free and contains a wealth of trace elements.**

Unlike some pollen capsules and multi-vitamins **BeePower®** is 100% natural. A unique fusion of fresh Bee Pollen and Eucalyptus Honeys enables easy absorption into the body. Taken as a daily supplement, (ie. One teaspoon a day or in milkshakes, smoothies, on toast or cereal).

Quality Assurance

QA is an essential and necessary part of **BeePower®** production.

- All product undergoes three levels of individual & batch assessment,
- All ingredients are assessed on a batch by batch basis,
- Each bottle is individually inspected for net capacity, air-tightness etc.

BeePower® is infused with Bee Pollen and Low GI Eucalyptus Honey

➤ By infusing the bee pollen with the honey, the **pollen becomes incapable of deterioration or decay** while it is immersed within the honey. Bacteria cannot thrive in a honey medium, due to its hygroscopic (anti-moisture) properties. By infusing this combination of bee pollen and honey, both **remain pure and intact for many years**,

- Bee Pollen also **contains active antibiotic substances** that immediately destroy harmful pathogenic bacteria upon contact,
- High in **Aspartic Acid** which is valuable for the body and its rejuvenation,
- Bee Pollen has a **dramatic effect upon mental perception** during athletic performances.
